BestRun EV

Apex Pre-Order Discount Policy

Valid for Pre-Orders Placed Before Official Launch Date - Authorized Dealers Only

1. Policy Overview

BestRun EV offers a structured pre-order discount programme to encourage early stock commitments ahead of the Apex Series launch. Discounts are applied to the dealer net price at checkout on the pre-order portal. This document describes all discount tiers, bonus conditions, model-specific exceptions, and stacking rules.

Note: Pre-order discounts are applied on top of the standard dealer tier margin. They are not available on standard (post-launch) orders.

2. Base Discount Matrix

The base pre-order discount is determined by two factors: (1) the total quantity of units ordered across all Apex models in a single pre-order, and (2) the selected payment terms.

Order Quantity	Upfront Payment	Net 30	Net 60
1-4 units	3%	1%	0%
5-9 units	7%	5%	3%
10-19 units	10%	8%	5%
20-49 units	14%	11%	8%
50+ units	18%	15%	10%

Example: A dealer ordering 12 units (any mix of Apex City, Trail, and Pro) with Net 30 payment terms receives an 8% pre-order discount on the dealer net price of all units in that order.

3. Additional Bonus Conditions

3.1 Early Bird Bonus (+2%)

An additional 2% discount applies to any pre-order submitted at least 60 days before the official Apex Series launch date.

- The launch date is communicated via the dealer portal and your regional account manager.
- Eligibility is calculated from the pre-order submission timestamp (portal server time, CET).
- The early bird bonus applies to the entire order, not individual line items.

3.2 First Pre-Order Bonus (+1%)

An additional 1% discount applies to dealers placing their first-ever pre-order with BestRun EV. This bonus is a one-time entitlement per dealer account.

- Eligibility is determined automatically by the pre-order system based on dealer account history.
- Dealers who previously placed a pre-order for any BestRun EV product are not eligible.
- The first pre-order bonus applies to the entire order.

4. Model-Specific Exceptions

4.1 Apex Pro - Discount Cap (10%)

Due to constrained initial production allocation, the total pre-order discount applicable to Apex Pro units is capped at 10%, regardless of order quantity, payment terms, or bonus eligibility.

Scenario	Calculated Discount	Applied (Apex Pro)
20 units, upfront, no bonuses	14%	10% (capped)

12 units, upfront, early bird	10% + 2% = 12%	10% (capped)
50 units, upfront, early bird + first order	18% + 2% + 1% = 21%	10% (capped)
10 units, net 30, no bonuses	8%	8% (under cap - no adjustment)

Note: The Apex Pro cap applies per unit of Apex Pro ordered. If a pre-order contains both Apex Trail and Apex Pro units, the Apex Trail units receive the full calculated discount; only Apex Pro units are subject to the 10% cap.

5. Stacking Rules

- The base matrix discount, early bird bonus (+2%), and first pre-order bonus (+1%) stack additively.
- The Apex Pro cap (10%) is applied after all stacking - it is a ceiling, not a starting point.
- Pre-order discounts stack on top of the dealer tier margin (Silver/Gold/Platinum). They do not replace it.
- No other promotional discounts apply during the pre-order window. Pre-order discounts cannot be combined with any other active BestRun EV promotional offer.

6. Worked Examples

Example A - Apex Trail, 12 units, upfront, early bird

Dealer: Gold tier. Order: 12 Apex Trail, upfront payment. Order date: 75 days before launch.

Component	Value
Base discount (10-19 units, upfront)	10%
Early bird bonus (75 days > 60 days)	+2%
First pre-order bonus	Not applicable (existing dealer)
Total pre-order discount	12%
Apex Pro cap	N/A (no Apex Pro in order)
Final discount applied	12% on all 12 Apex Trail units

Example B - Apex Pro, 5 units, upfront, first order

Dealer: Silver tier. Order: 5 Apex Pro, upfront payment. Order date: 30 days before launch (first pre-order).

Component	Value
Base discount (5-9 units, upfront)	7%
Early bird bonus (30 days < 60 days)	Not applicable
First pre-order bonus	+1%
Stacked total before cap	8%
Apex Pro cap check (8% < 10%)	Under cap - no adjustment
Final discount applied	8% on all 5 Apex Pro units

Example C - Mixed order, Apex Pro + Apex Trail, 30 units

Dealer: Platinum tier. Order: 20 Apex Pro + 10 Apex Trail, upfront payment. 65 days before launch (first pre-order).

Component	Value
Base discount (30 units total, upfront)	14%
Early bird bonus (65 days > 60 days)	+2%
First pre-order bonus	+1%
Stacked total before cap	17%
Applied to Apex Trail (10 units)	17% - no cap
Applied to Apex Pro (20 units)	10% - capped at 10%

7. Pre-Order Validity & Confirmation

A pre-order is considered binding once the dealer receives an email confirmation with a pre-order reference number. The discount rate is locked at the time of submission and cannot be changed after confirmation. If a pre-order is

cancelled and re-submitted, the new submission date applies for early bird eligibility.
